Retail Dataset – Business Problem (BP)

A retail company wants to **analyze its sales performance, profitability, and regional demand patterns** to improve business decisions.

The company needs insights into **sales trends, product performance, customer demand, and regional profitability** to optimize inventory, marketing strategies, and product offerings.

Key Performance Indicators (KPIs)

1. Sales Performance KPIs

- **Total Sales Revenue**
  Total revenue generated by all orders.
- **Total Orders**
  Total number of orders placed by customers.
- **Average Order Value (AOV)**
  Average value of each order.
- **Total Quantity Sold**
  Total number of products sold.

2. Product Performance KPIs

- **Top Selling Products**
  Products generating the highest revenue.
- **Sales by Product Category**
  Total sales grouped by product category.
- **Product Contribution %**
  Percentage of total revenue contributed by each product.

3. Customer Insights KPIs

- **Total Customers**
- **Top Customers by Revenue**
- **Average Customer Spend**
- **Customer Purchase Frequency**

4. Geographic Performance KPIs

- **Sales by Region**
- **Sales by City**
- **Orders per Region**

5. Profitability KPIs (if profit column exists)

- **Total Profit**
- **Profit Margin %**

- **Profit by Category**

Charts Required for Dashboard

Sales Overview Section

1. KPI Cards

- Total Sales
- Total Orders
- Average Order Value
- Total Customers

Sales Trend Analysis

2. Line Chart – Monthly Sales Trend

X-axis: Month
Y-axis: Sales

Purpose: Identify **seasonality and growth trends**.

Product Performance

3. Bar Chart – Sales by Product Category

X-axis: Category
Y-axis: Total Sales

Purpose: Identify **best performing categories**.

4.Top 10 Products Chart

X-axis: Product Name
Y-axis: Revenue

Purpose: Identify **most profitable products**.

Customer Insights

5. Bar Chart – Top Customers

X-axis: Customer Name
Y-axis: Total Sales

Purpose: Identify **high-value customers**.

Geographic Insights

6.Map / Bar Chart – Sales by Region or City

Purpose: Identify **high-performing regions**.

Order Behavior

7.Histogram – Order Value Distribution

Purpose: Understand **order size patterns**.

Category Contribution

8.Pie Chart – Category Sales Share

Purpose: Show **percentage contribution of each category**.

Suggested Power BI Dashboard Layout

Top Section (KPI Cards)

- Total Sales
- Total Orders
- Avg Order Value
- Total Customers

Middle Section

- Monthly Sales Trend (Line Chart)
- Sales by Category (Bar Chart)

Bottom Section

- Top Products (Bar Chart)
- Sales by Region (Map)
- Pie chart

Expected Business Insights

The dashboard should help answer questions like:

- Which **product categories drive most revenue**?
- Which **cities generate the highest sales**?
- Who are the **top customers**?
- Are sales **growing month-by-month**?
- Which **products should be stocked more**?
